

# legacy control panels

A complete range of X-Y and single-output controllers. Rack mount, panel mount, desk mount; alphanumeric display, LCD, pushbutton.

Control Panels on this page are compatible with all versions of SAS routing systems. However, if you have a 32KD or RIO system, we recommend using the panels found on our Router Control Panel datasheet.

## Rack Mount

**AXC-8 X-Y**  
Input/Output Alpha Control Panel  
1 RU, large LED source and output indicator.

**ANC-8, ANC-8D (shown)**  
Single Output Alpha Control Panel  
1 RU, large LED source indicator.  
ANC-8D is two single output controllers in one 1 RU package.

**APR-88, APR-88D (shown)**  
Single Output Alpha Control Panel  
1 RU; small LED source indicator; 8 programmable source select pushbuttons.

**CDS-8, CDS-8D, CDS-8Q (shown)**  
Single, Dual, Quad Single Output Alpha Control Panel  
1 RU; LCD display of active and next source. Available in one, two, or four output configurations.

**PBS-16, PBS-32, PBS-64 (shown)**  
Single Output Pushbutton Select Control Panel  
1 RU; 16, 32, or 64 programmable source select pushbuttons.

## Desktop

**DSS-8**  
Single Output Alpha Control Panel  
With Speaker. Small LED source indicator.

**CDS-8DT**  
Single Output Alpha Control Panel  
LCD display of active and next source.

## Console Mount

Designed to mount in traditional broadcast consoles; configurations available for most consoles.

**CPI-80**  
Single Output Alpha Control Panel  
Small LED source indicator.

**APC-88**  
Single Output Alpha Control Panel  
Small LED source indicator; 8 programmable source select pushbuttons.

**DSS-2**  
Single Output Alpha Control Panel  
Dual LCD display.

**CDS-8CM (shown), CDS-8DCM**  
Single Output Alpha Control Panel  
LCD display of active and next source.  
CDS-8D is two single output controllers in one console-mount panel.

**CRS-40**  
Control Room Selector  
Four control rooms, five buttons.
